AN OPEN LETTER TO SENATOR JOSEPH R. BIDEN

Senator Biden, your reckless disregard for the United States Constitution and the Rule of Law has brought this country near a point of no return, and I believe I represent the majority of Americans when I call upon you to think carefully about your upcoming actions in regard to the Supreme Court.

Most American citizens are now aware that the 2020 Election was fraudulent, and that you did not earn and do not deserve the office which you claim. Evidence of a multi-state election conspiracy already exceeds what would normally be needed to procure a Grand Jury indictment, and more evidence is being exposed every day.

You have the same protections and rights against self-incrimination as any American citizen, so I certainly do not expect you to admit to your role in the conspiracy, or even admit to its existence; that will be exposed in due course through traditional legal means. However, you must understand that given the likelihood that the means by which you achieved your claimed office will be soon the subject of a landmark Supreme Court case, appointing a Supreme Court Justice to a lifetime appointment will likely cause a constitutional crisis which will impose an undue burden on our Republic. Any Justice that you would nominate would be required to recuse themselves from any Court

proceedings on this matter, leading to the possibility of a split vote and national chaos.

Therefore, on the behalf of the American people, I implore you to make no nomination to the Court until the legality of the 2020 election is finally determined by that Court. Furthermore, I request that you ask Justice Breyer to forego his retirement until that time, so that a full court can hear the case against you and a fair reckoning can be achieved.

If you truly believe that the results of the 2020 Presidential Election as certified represent the true and accurate will of the people, then you can, by executive order, require all state and county election boards to make all 2020 election records (other than those which specifically identify any protected personal information on voters) open for inspection. This should include all access to voter rolls and voting histories, paper and electronic ballots, and per-ballot reporting indicating times, candidate choices, precincts, and style of voting.

Speaking for myself, I pledge with my sacred honor that I would produce a fair and accurate report of results for every county and state, no matter the nature of those results. Many other technical and election experts would also make that same pledge. The process of running elections in this country would become open and transparent, as was intended by our nation's founders.

If the data shows that the certified results were accurate, I would accept this outcome, as would the majority of Americans. If not, at the very least you would have done a service to your country by allowing the resolution of this election crisis which is preventing any real national unity or progress.
