

GENERAL ANALYSIS

According to the voter rolls, 2,478,217 people have voted in either the 2020 General Election or afterwards. The official South Carolina results state the ballots received as 2,533,010. This is a difference of over 50,000 ballots and must be explained. If these have been purged from the voter rolls so soon after having voted, there should be a “purge list” which matches this number. If it does not, then this is a serious **Red Flag**.

*Note: The Rolls do not indicate whether a voter voted in a particular election, rather, they indicate the *last* election in which a voter participated. As there was a local election in the Spring of 2021, some voters may have not voted in November but voted in *that* election. This would only increase the disparity between the votes reported by the state and the votes reported on the Rolls.

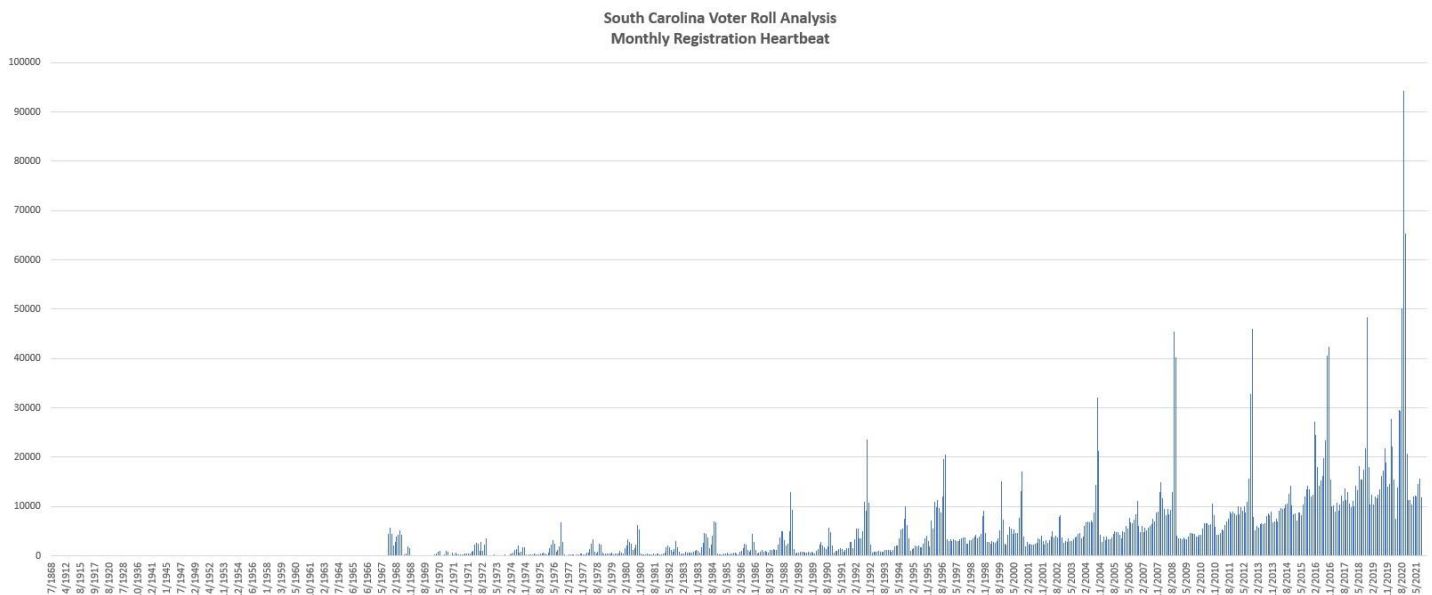

The breakout of votes by county are listed here:

County	Votes (from Rolls)	Votes (per From State)	Missing	% Missing
Abbeville	12,262	12,543	281	2.24%
Aiken	82,928	85,853	2,925	3.41%

REGISTRATION DATE ALYSIS

The following graph shows the dates South Carolina voters were registered, and the blue bars show how many were registered on any date (the Registration Date EKG).

Restricting the graph to those who have voted since November 2020, you get an only slightly different picture:

Observations:

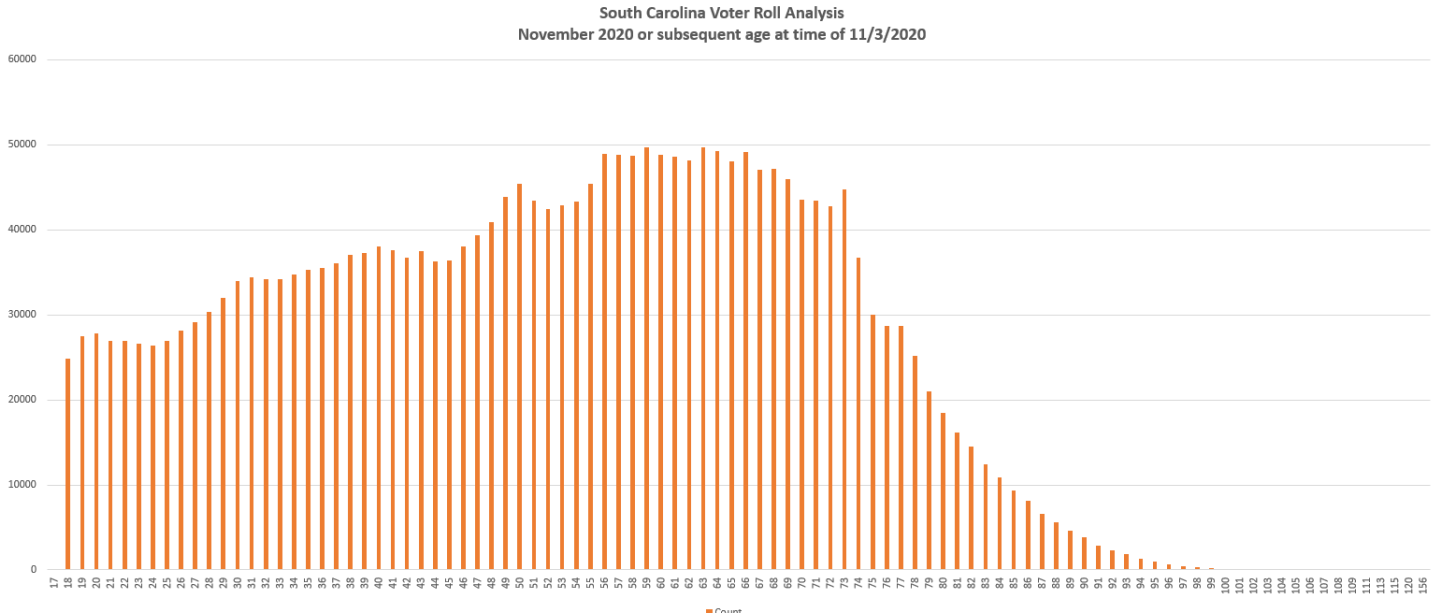

As expected, registrations spike right before elections, particularly General elections. Of note is that the 2020 spike was intense. In September 2020 alone, more than 90,00 voters were registered. This was about twice the previous month high of 48,000 in November 2018. 8,471 people were registered on September 22nd alone.

225,912 voters were registered between June 1 and election day 2020. This represents more than 6% of the total South Carolina registration. 179,502 of these new registrants subsequently voted (79%), accounting for over 7% of all voters.

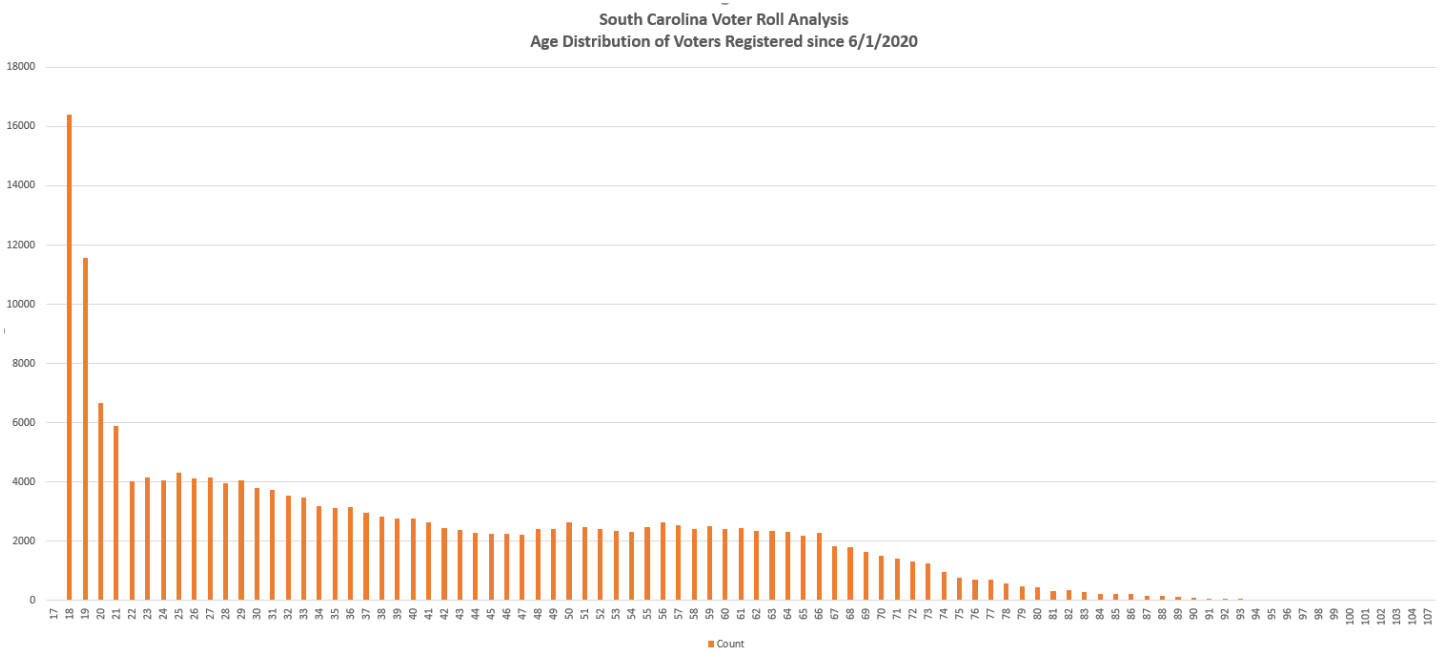

A few anomalous dates were detected, registration dates in 1868, 1888, 1892, and 1896 are most likely errors, as are several in 1900. There are also a handful of registrations in the years 2111, 2996, and 4021, so unless the South Carolina Elections Board has access to time travel these are obviously mistakes as well. In something as important as our elections, no errors should be accepted and tolerated. If the system does not flag such obvious errors, the next question will be what other errors are also not being detected or addressed?

VOTER AGE ALYSIS

The following chart shows the distribution of ages of the voters who voted in November 2020 or after.

This is the same chart, but for just the voters who registered between June 1st and November 3rd, 2020.

Observations:

These charts show that a large number of 18-year-old citizens were registered in the 6 months before the election and they voted at a higher rate than any other age. In fact, the “direction” of the curve of the recently registered runs counter to the overall trend. This is a definite **red flag**. In particular, please note the 18, 19, 20, and 21 age bars.

Voter Analysis

a. Duplicate Voters

A preliminary analysis of the voter rolls found four voters who, according to the records, have two active records and definitely voted in the November 2020 election. Additionally, two other voters who had one record of voting in November 2020 and another record of voting in the April 2021 election were found:

Name	Address	Reg #1	Reg #2	Last Voted 1	Last Voted 2
Robert T McCrudden	36 Downing Dr NA Beaufort 29907	74440018	74492389	10/15/2020	11/3/2020
Shirley M Gilliard	7295 Highway 162 NA Hollywood 29449	100216602	471345539	6/1/2021	10/23/2020
Darrel M Gainey	2458 Sampit Dr NA Hartsville 29550	165075161	165075195	4/13/2021	11/3/2020
Leavin H Jackson	1613 Hampton Dr NA Beaufort 29906	71942937	74532070	11/3/2020	11/3/2020
Kurt D Rolf	137 Harmon Creek Dr NA Lexington 29072	470212249	326293492	11/3/2020	11/3/2020
Mary E Del Castillo	118 Adler Rd NA West Columbia 29170	326217983	326254622	11/3/2020	11/3/2020

813 additional voters were found to have two active records. The complete list is included at the end of this document in Appendix A.

The method of detecting these duplicates is straight-forward. Two voter records are considered duplicates if their first, middle, and suffix of their names match, as well as their address and their date of birth.

b. Incomplete Records

15 Voters are missing either a first name or a last name. The applicable registration numbers are listed below:

470370809

471170769

471499827

74506190

471462599

471434943

471457025
470597076
471132201
84587635
471324425
406567502
406858609
471469656

c. Registration Number Length Inconsistencies

The voter registration numbers are assigned lengths of either 8 digits (347,540 records) or 9 digits (3,189,537 records). This lack of uniform length may be a **red flag** that indicates multiple sources are entering records without the same standards.

d. Registration Number Sequence Issues

The 9-digit voter registration numbers appear to be in logical sequence over time and are largely consecutive. The 8-digit numbers, however, have no logical sequence based upon the registration dates and have large gaps between the numbers. This is a **red flag** because new registrations can be “hidden” in the middle of old ones with no way of detecting it.

The differences between the 9-digit and 8-digit voters should be investigated and demystified in order to gain confidence in the registration system.

Summary

The voter roll system has numerous **red flags** which cast doubt upon the accuracy of the registration system. In particular, the duplicate records are extremely troubling as they may indicate that “phantom voters” are being created or reactivated to post votes. When viewing these findings, please remember that they may only be an indicator to a larger problem which was more effectively hidden in the data. To perform a more complete analysis, a voter roll from December 2020 or January 2021 would be critical to map the changes between immediately post-election to the late-2021 version which I analyzed here.

I have analyzed these voter rolls to the best of my professional ability and time available.

Jeffrey O'Donnell
